Verification of Greenhouse Gases

Carbon Footprint of Product Verification Statement

(CFP-GR-2410001)

The Inventory of Carbon Footprint of Product for the year 2024

of

AWARDS CEREMONY 2024

by

ESG SHIPPING AWARDS 2024

Based on life cycle assessment verified in accordance with ISO 14064-3:2019

as meeting the requirements of

ISO 14067:2018

Basis of Assessment

Cradle to Grave Life Cycle Phases

Authorized by:

Kostas Antoniadis
Managing Partner
Date: 15.10.2024

Product Name	AWARDS CEREMONY 2024	
Declared Unit	Per EVENT	
Functional Unit	Per EVENT	
Life Cycle GHG emissions		
Declared Unit emissions (Unit: kilograms of CO2e)		Functional Unit emissions (Unit: kilograms of CO2e)
Life Cycle Stage	Total	
AWARDS CEREMONY 2024	43.580	43.580

1. Roles and responsibilities

The management of **ESG SHIPPING AWARDS** (hereinafter referred to as the “Event Organizer”) is responsible for the preparation and fair presentation of the GHG statement in accordance with ISO 14064-1:2018 methodology.

It is EMICERT’s responsibility to express an opinion on the GHG statement based on our verification. We conduct our verification in accordance with the ISO 14064-3:2019 specifications against the requirements of ISO14067:2018. This international Standard requires that we comply with ethical requirements and plan and perform the verification to obtain reasonable assurance that the on-site GHG emissions in the GHG statement are free from material misstatement.

EMICERT conducted a third-party verification of the provided GHG emissions avoidance against the principles of ISO 14067:2018 and ISO 14064-3:2019 for the year 2024. The verification was based on the verification scope as agreed between the Event Organizer and EMICERT.

2. Scope

EMICERT has been contracted by the Event Organizer for the verification on the life cycle Greenhouse Gas emissions of the product “AWARDS CEREMONY 2024” in accordance with ISO 14067:2018 and ISO 14064-3:2019 as provided by the Event Organizer, concerning the GHG emission within the scope as described below.

- Description of activities: Product carbon Footprint verification of Cradle to Grave Life Cycle Phases of AWARDS CEREMONY 2024
- Functional Unit: Per Event
- Declared Unit: Per Event
- System boundary: Cradle to Grave assessment of the full life cycle emissions in accordance with ISO 14067:2018
- Data resources: The primary data collection is from operational control phases. The secondary data collection is from:
 - Residual Energy Mix 2022 (DAPEEP)
 - DEFRA 2023
 - ICAO Carbon Emission Calculation
 - Greenview Hotel Footprinting Tool
 - Agribalyse 3.1.1
 - Ecoinvent 3.10
 - EPA 2018 & 2019
 - Market Economics Limited
- Life cycle emissions are calculated by Excel
- Event location: Grand Hyatt in Athens, 115 Syngrou Avenue, 117 45 Athens, Greece
- GHG information for the following production period is verified:
- Intended Use of the Verification Statement: Private

3. Objective

We conducted our verification regarding the GHG statement of the Event Organizer which included assessment of GHG calculation spreadsheets of the Event Organizer.

This assessment included the collection of evidence supporting the reported data, site visits and interviews, estimate checking, cross-checking and recalculation.

Date of site visit: 20.05.2024

4. Criteria

The Verification assessment is undertaken using the principles of ISO 14067:2018 and ISO 14064-3:2019.

5. Materiality

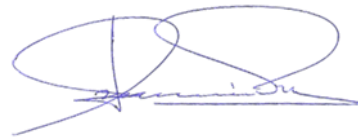

The materiality required of the verification was considered by EMICERT to 5%, based on the needs of the intended user of the GHG assertion.

6. Opinion

EMICERT's assessment included the collection of evidence supporting the reported data and checking whether the calculations proposed by the ISO 14067:2018 methodology were consistently and appropriately applied.

In our opinion, the GHG emissions in ESG SHIPPING AWARDS GHG statement present fairly, in all material respects, the GHG emissions of Event Organizer in accordance with ISO 14067:2018 methodology.
